

Impression Dental Group – Coastal Dental Care

MN-90015

Phase 1 Determination

Acquisition may be put into effect

25 June 2026

1. Determination and statement of reasons

Notified acquisition	General Dental Holdings Pty Ltd (trading as Impression Dental Group) (IDG) proposes to acquire 100% of the shares in Coastal Dental Care Australia Pty Ltd (CDC), through a share sale deed.
Determination	The Australian Competition and Consumer Commission has determined under section 51ABZE(1) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition may be put into effect.
Parties to the Acquisition	CDC is owned by Dr Franck Page and operates 15 dental practices across the Redland Bay and Gold Coast areas in Queensland and in Northern NSW under the Coastal Dental Care, Dental Implants & Aesthetics, and Gold Coast Holistic Dental Care names. CDC also has a dental laboratory (The Lab), a denture clinic (Gold Coast Dentures by Design) and a dental supplies organisation (Dental Plus). IDG is an Australian-based dental support organisation that provides centralised services, including recruitment, payroll, marketing, IT, finance, and operation, to dental practitioners. IDG currently owns and supports 23 independently branded dental practices in Australia which provide dental services to the public, but IDG does not have any practices in the Redland Bay and Gold Coast areas or Northern NSW. IDG is controlled by Genesis Capital, an Australian-based private equity firm that invests in businesses operating in the healthcare sector. Genesis Capital's investments also include Pacific Smiles Group (PSG) which sets up new dental centres from which dentists run their practice and provides operational support. PSG has over 120 dental centres across Australia, including 1 in the Redland Bay area, 5 on the Gold Coast, and 1 in Tweed. PSG's dental centres are typically located inside shopping centres and operate under the Pacific Smiles Dental and nib Dental Care brands on the East Coast.
Overlap and relationship between the parties	The parties overlap in the supply of dentistry services. CDC also supplies products used in the supply of dentistry services, including dentures, mouthguards and retainers, crown and bridge laboratory services and intraoral cameras.
Reasons for determination	When making a determination in Phase 1, the Australian Competition and Consumer Commission (ACCC) undertakes a competition assessment and considers whether it is appropriate for an acquisition to be approved or subject to further assessment in Phase 2 in accordance with section 51ABZJ of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). In doing so, the ACCC must have regard to the object of the Act and all relevant matters, including the interests of consumers. For more information about the ACCC's approach to considering notified acquisitions, see the ACCC's merger assessment guidelines and interim merger process guidelines. In conducting its competition assessment, the ACCC has considered the information and documents that were submitted with the

	notification form, information from third parties and publicly available information. The ACCC has determined that the Acquisition may be put into effect as it considers that the Acquisition is unlikely to have the effect of substantially lessening competition in any market. In reaching its decision, and based on the material before it, the ACCC makes the following findings. • The aggregation in the supply of dentistry services in the local areas surrounding CDC's clinics arising from the Acquisition, including any specialist dentistry services, is not significant. When combined with previous acquisitions by IDG in the last three years, the Acquisition is not likely to affect competition in local areas or any broader market. • IDG will continue to face competition post Acquisition from a number of alternative dental clinics in the local areas surrounding CDC's clinics. • Post acquisition, IDG would be unlikely to have the ability and incentive to foreclose competitors' access to inputs given the presence of multiple alternative suppliers of dentures, mouthguards and retainers, crown and bridge laboratory services, and intraoral cameras.
Applications for review	A notifying party, or other person who has been allowed to do so by the Australian Competition Tribunal, may apply for review if they are dissatisfied with the determination. Pursuant to section 100C of the Act, applications for review of the determination are to be made to the Australian Competition Tribunal before the end of 14 calendar days after this statement of reasons was included on the ACCC's Acquisitions Register. To confirm whether there has been any application for review, please contact the Australian Competition Tribunal.

Determination made by Commissioner Williams pursuant to a delegation under section 25(1) of the Act
