

Notification Waiver Determination

Geosyntec Consultants – WRM Water & Environment

Acquisition	Geosyntec Consultants (Australia) Intermediate Holding Pty Ltd, applied for a notification waiver in respect of its corporate group's (Geosyntec) proposed acquisition 100% of the issued share capital of WRM Water & Environment Pty Ltd (WRM) as described in the transaction documents provided as part of the application (the Acquisition).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition is not required to be notified.
Date of determination	24 September 2026

Parties to the Acquisition	Geosyntec and WRM both supply environmental consulting services. Geosyntec's services include environmental auditing, site investigations, remedial designing and hydrogeological assessments. WRM's services include water engineering and related environmental consulting services, including surface water and flood risk management, mine water management, and the provision of insurance/independent expert witness services in relation to disputes about flooding and hydrological impacts.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the ACCC) has considered the information provided with the notification waiver application and certain publicly available information, and had regard to the factors in section 51ABV(2)(b) of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). Based on the information provided in the application, the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition given: - the parties' combined share in the supply of the environmental consulting services, including water engineering and management services, supplied by Geosyntec is estimated to be low. - there are alternative suppliers of the environmental consulting services, including water engineering and management services, supplied by Geosyntec and WRM in Australia. In these circumstances, the ACCC does not consider it necessary to reach a concluded view on the likelihood of the notification thresholds being met.

	Given that material competition concerns are unlikely to arise, the ACCC has determined that the Acquisition is not required to be notified. The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's guidance on notification waivers and merger assessment guidelines.
