39% involved an overseas-registered acquirer or target (107 of 271). A party counts when the register gives it a foreign registration number, or no ABN or ACN and an overseas legal form (Inc, GmbH, S.p.A.…); unclear cases are left out, so this is a floor.

Notes

Decisions count in the quarter they were made; notifications in the quarter they were filed. Waivers reach the ACCC's register only once decided, so they are counted when decided. Phase 1 timing runs from notification to the phase 1 determination, or to the referral for a matter sent to phase 2. All durations are business days, as the statutory clocks count them.
