

Remedy offer – 28 May 2026: Heidelberg Materials Australia – construction materials business of MAAS

MN-50009

Summary

To address any potential ACCC concerns arising from the Acquisition in:

- the supply of ready-mix concrete (RMX) in Blackwater; and
- the supply of coarse aggregates in Central Queensland,

HMA proposes to divest:

- the HMA Blackwater RMX plant; and
- the HMA Yalkara hard rock quarry,

(collectively, the **Divestitures**).

Assets

- **Blackwater RMX plant**

The HMA Blackwater RMX plant is a RMX plant located at Railway Street, Blackwater QLD 4717.

HMA operates the plant pursuant to a lease arrangement. Under its remedy offer, HMA proposes to transfer or surrender its interests under this lease to the purchaser, together with all assets currently used in and comprising the HMA Blackwater RMX plant.

- **Yalkara hard rock quarry**

The HMA Yalkara hard rock quarry is located at Orange Creek Road, Orange Creek QLD 4715. The quarry is currently operated by HMA and primarily produces coarse aggregates.

HMA proposes to divest all assets currently used in and comprising the HMA Yalkara quarry to the purchaser.

Rationale

The Divestitures are intended to ensure that in each of the relevant markets:

- there is no consolidation of production capacity or quarry reserves; and
- the number of market participants remains unchanged following the Acquisition.

Proposed purchaser

HMA intends to divest the HMA Blackwater RMX plant and HMA Yalkara hard rock quarry to Corbet's Group. Corbet's is a diversified, privately-owned transport, plant and equipment services business headquartered in Gympie, Queensland. Its operations include heavy haulage, bulk transport, land clearing and grinding, site construction and rehabilitation, heavy plant and equipment hire and bulk landscape supplies.

Alternatively, HMA will divest the HMA Blackwater RMX plant and HMA Yalkara hard rock quarry to another purchaser approved by the ACCC.
