

Notification Waiver Determination

Zijin Mining – Chifeng

Acquisition	Zijin Gold (Group) Co., Ltd., a wholly-owned subsidiary of Zijin Mining Group Co., Ltd. (Zijin Mining), applied for a notification waiver in respect of its proposed acquisition of an interest Chifeng Jilong Gold Mining Co., Ltd. (Chifeng), as described in the transaction documents provided as part of the application (the Acquisition). Post-Acquisition, Zijin Mining will hold approximately 25.85% of the total number of shares in Chifeng, and acquire controlling power in Chifeng.
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition is not required to be notified.
Date of determination	25 May 2026

Parties to the Acquisition	Zijin Mining is a global mining company listed on the Hong Kong Stock Exchange and the Shanghai Stock Exchange. It is primarily engaged in exploration, mining and processing of mineral resources. Its principal products include gold, copper, zinc, lithium, silver, molybdenum and other metals such as iron ore concentrate, cobalt and sulfuric acid. Norton Gold Fields Pty Ltd (Norton), a wholly-owned subsidiary of Zijin Gold International Company Limited (a company under control of Zijin Mining), is a gold producer with mining and processing operations in Western Australia. The Norton Group is one of Australia's largest domestic gold producers with mining and processing complexes located in Western Australia's Kalgoorlie gold region. Chifeng is a gold mining company listed on the Hong Kong Stock Exchange and the Shanghai Stock Exchange. Chifeng owns 7 operating mines and a resources recycling company in China, Southeast Asia and West Africa. Chifeng's main product is gold, and it also produces copper, lead, zinc, molybdenum and rare earths. Chifeng does not have any operating mines, assets or subsidiaries in Australia. Zijin Mining and Chifeng both supply gold doré to customers in Australia.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the ACCC) has considered the information provided with the notification waiver application and had regard to the factors in section 51ABV(2)(b) of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act).

	Based on the information provided in the application, the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition. In particular: a. the parties' combined share in the supply of gold doré to customers in Australia is low b. there are several alternative suppliers of gold doré to customers in Australia c. there is a low risk of foreclosure or other concerning vertical or conglomerate effects resulting from exclusionary conduct, bundling or tying of gold concentrate, gold doré and gold bullion post-acquisition. The ACCC has also had regard to the likelihood that, if the Acquisition were put into effect, the notification thresholds determined under section 51ABP(1) of the Act would apply. While the ACCC considers that the notification thresholds are likely to be met, given that material competition concerns are unlikely to arise, the ACCC has determined that the Acquisition is not required to be notified. The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's interim guidance on notification waivers and merger assessment guidelines.
