Notification Waiver Determination

Woodside – PetroChina's interest in Browse unincorporated joint venture

Acquisition	Woodside Browse Pty. Ltd. (**Woodside Browse**), as a subsidiary of Woodside Energy Group Ltd (**Woodside**), applied for a notification waiver in respect of its proposed acquisition of PetroChina International Investment (Australia) Pty Ltd's, as a subsidiary of PetroChina Company Limited (**PetroChina**), 10.67% participating interest in the Browse unincorporated joint venture (**Browse JV**), as described in the transaction documents provided as part of the application (the **Acquisition**).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the *Competition and Consumer Act 2010* (Cth) that the Acquisition is not required to be notified.
Date of determination	20 October 2026

Parties to the Acquisition	The acquirer, Woodside, is a global independent energy company listed on the Australian Securities Exchange and the New York Stock Exchange. Woodside's portfolio includes explorations, developments, and oil and gas projects, which include the production of liquefied natural gas (**LNG**), natural gas for domestic supply (domestic gas), oil, condensate, natural gas liquids (**NGLs**) and ammonia. Woodside Browse already holds a 30.60% participating interest in the Browse JV, and Woodside Energy Ltd is the current operator for the Browse JV. PetroChina engages in the exploration and development of oil and gas reserves, and the supply of oil and gas. PetroChina is owned by the China National Petroleum Corporation, which is owed by the Government of the People's Republic of China. The Browse resource is an undeveloped conventional gas resource with the potential for production of LNG, condensate, NGLs and domestic gas, located off the west coast of Australia. The Browse JV is proposing to develop the Calliance, Brecknock and Torosa conventional natural gas fields located in the Browse Basin (Browse Project). The proposed concept includes two floating production storage and offloading facilities, and a pipeline connecting to existing infrastructure for the North West Shelf. Natural gas extracted from the Browse Basin will be processed at the Karratha Gas Plant in Western Australia into LNG for export and domestic gas.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the **ACCC**) has considered the information provided with the notification waiver application and

	had regard to the factors in section 51ABV(2)(b) of the *Competition and Consumer Act 2010* (Cth) (the **Act**). Based on the information provided in the application the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition given: a. the Acquisition does not result in the removal of a competitor or substantial change to Woodside's competitive position as it is already a party to the Browse JV and the Browse JV is not currently producing gas in WA b. domestic gas supply and prices in WA are regulated by the Western Australian Government c. there are alternative producers and suppliers of LNG and domestic gas to customers in WA. In these circumstances, the ACCC does not consider it necessary to reach a concluded view on the likelihood of the notification thresholds being met. Given that material competition concerns are unlikely to arise, the ACCC has determined that the Acquisition is not required to be notified. The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's guidance on notification waivers and merger assessment guidelines.

Determination made by Commissioner Williams pursuant to a delegation under section 25(1) of the Act
