

Sinopec - CNAF

MN-01093

Phase 1 Determination

Acquisition may be put into effect

30 April 2026

1. Determination and statement of reasons

Notified acquisition	China Petrochemical Corporation (Sinopec) is proposing to acquire 100% of China National Aviation Fuel Group Limited (CNAF) (the Acquisition).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABZE(1) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition may be put into effect.
Parties to the Acquisition	The acquirer, Sinopec, is a Chinese stated-owned energy company that conducts energy investment, natural gas production, petroleum product trading, lubricant and chemical product sales, and retail fuel expansion. Sinopec's activities include jet fuel trading and marketing. The target, CNAF, is a Chinese state-owned aviation fuel provider, which provides purchase, transport, storage, inspection, sales and into-plane service of aviation fuel. CNAF's activities are primarily international. In Australia, CNAF does limited jet fuel trading.
Overlap and relationship between the parties	The relevant market to the transaction is jet fuel production and supply. The parties overlap in the production and supply of jet fuel in Australia.
Reasons for determination	When making a determination in Phase 1, the Australian Competition and Consumer Commission (ACCC) undertakes a competition assessment and considers whether it is appropriate for an acquisition to be approved or subject to further assessment in Phase 2 in accordance with section 51ABZJ of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). In doing so, the ACCC must have regard to the object of the Act and all relevant matters, including the interests of consumers. For more information about the ACCC's approach to considering notified acquisitions, see the ACCC's merger assessment guidelines and interim merger process guidelines. In conducting its competition assessment, the ACCC has considered the information and documents that were submitted with the notification form. The ACCC has determined that the Acquisition may be put into effect as it considers that the Acquisition is unlikely to have the effect of substantially lessening competition in any market. In reaching its decision, and based on the material before it, the ACCC makes the following findings. • The market share aggregation arising from the acquisition is low and is estimated at less than 10 per cent. • The merged firm would likely continue to be constrained by alternative suppliers of jet fuel in Australia (e.g. Ampol, Viva Energy, Caltex, BP).
Applications for review	A notifying party, or other person who has been allowed to do so by the Australian Competition Tribunal, may apply for review if they are

	dissatisfied with the determination. Pursuant to section 100C of the Act, applications for review of the determination are to be made to the Australian Competition Tribunal before the end of 14 calendar days after this statement of reasons was included on the ACCC's Acquisitions Register. To confirm whether there has been any application for review, please contact the Australian Competition Tribunal.
