Notification Waiver Determination

Dicker Data – Sektor

Acquisition	Dicker Data Limited (**Dicker Data**) applied for a notification waiver in respect of its proposed acquisition of all fully paid ordinary shares in Sektor Group Limited (**Sektor**), as described in the documents provided as part of the application (the **Acquisition**).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the *Competition and Consumer Act 2010* (Cth) that the Acquisition is not required to be notified.
Date of determination	16 October 2026

Parties to the Acquisition	The acquirer, Dicker Data, is an ASX-listed company distributing a broad range of IT and IT-related products and value-added services to resellers in Australia and New Zealand, including the supply of networking and cybersecurity hardware and software solutions. The target, Sektor, distributes IT and IT-related products and value-added services to resellers in Australia, New Zealand, Thailand, and Malaysia, focussing on Point of Sale (**POS**) and Enterprise Mobility and Automatic Identification and Data Capture (**AIDC**), as well as cybersecurity and networking hardware and solutions. Both parties distribute networking and cybersecurity hardware and software solutions in Australia.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the **ACCC**) has considered the information provided with the notification waiver application, and had regard to the factors in section 51ABV(2)(b) of the *Competition and Consumer Act 2010* (Cth) (the **Act**). Based on the information currently before it, the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition. In particular: a. there is a small horizontal overlap between the types of IT and IT-related products the parties distribute in Australia, as the majority of Sektor's revenue is generated from the distribution of product segments which Dicker Data does not provide b. the increment in share in the wholesale IT and IT-related products, and networking and cybersecurity products, arising from the Acquisition is expected to be low c. there are alternative wholesale providers of IT and IT-related products, and cybersecurity and networking products, in Australia and globally.

	In these circumstances, the ACCC does not consider it necessary to reach a concluded view on the likelihood of the notification thresholds being met. Given that material competition concerns are unlikely to arise, the ACCC has determined that the Acquisition is not required to be notified. The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's interim guidance on notification waivers and merger assessment guidelines.

Determination made by Commissioner Woodward pursuant to a delegation under section 25(1) of the Act
