

Parker-Hannifin – CIRCOR A&D

MN-70026

Phase 1 Determination

Acquisition may be put into effect

6 August 2026

1. Determination and statement of reasons

Notified acquisition	Parker-Hannifin Corporation (Parker-Hannifin)’s proposed acquisition of the Aerospace and Defense business of CIRCOR International, Inc. (CIRCOR A&D).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABZE(1) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition may be put into effect.
Parties to the Acquisition	The acquirer, Parker-Hannifin, is a global engineering company headquartered in the United States. It designs, manufactures and supplies motion and control technologies and systems, and provides engineered solutions for a variety of mobile, industrial and aerospace applications. The target, CIRCOR A&D, designs, manufactures and supports flight-critical motion and flow control products for commercial aircraft and defence applications with manufacturing and operational locations in the United States, France and Morocco. To a more limited extent, CIRCOR A&D also supplies products for industrial applications.
Overlap between the Parties	Globally, Parker-Hannifin and CIRCOR A&D (the Parties) are both active in the supply of certain aerospace valves and switches. Parker-Hannifin primarily supplies system-level packages of products that include component parts (including valves and switches), while CIRCOR A&D supplies individual component parts. In Australia, the Parties both supply fluid control valves for industrial applications. CIRCOR A&D does not supply aerospace products in Australia.
Reasons for determination	When making a determination in Phase 1, the Australian Competition and Consumer Commission (ACCC) undertakes a competition assessment and considers whether it is appropriate for an acquisition to be approved or subject to further assessment in Phase 2 in accordance with section 51ABZJ of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). In doing so, the ACCC must have regard to the object of the Act and all relevant matters, including the interests of consumers. For more information about the ACCC’s approach to considering notified acquisitions, see the ACCC’s merger assessment guidelines and interim merger process guidelines. In conducting its competition assessment, the ACCC has considered the information and documents that were submitted with the notification form and information from third parties. The ACCC has determined that the Acquisition may be put into effect as it considers that the Acquisition is unlikely to have the effect of substantially lessening competition in any market. In reaching its decision, and based on the material before it, the ACCC makes the following findings. • The market aggregation resulting from the Acquisition in the supply of fluid control valves for industrial applications in Australia is estimated to be low. • There is no horizontal overlap between the Parties in the supply

	of aerospace components in Australia. • The Parties would likely continue to be constrained by alternative global suppliers of aerospace valves and switches.
Applications for review	A notifying party, or other person who has been allowed to do so by the Australian Competition Tribunal, may apply for review if they are dissatisfied with the determination. Pursuant to section 100C of the Act, applications for review of the determination are to be made to the Australian Competition Tribunal before the end of 14 calendar days after this statement of reasons was included on the ACCC's Acquisitions Register. To confirm whether there has been any application for review, please contact the Australian Competition Tribunal.

**Determination made by Commissioner Williams pursuant to a delegation under section 25(1)
of the Act**
