

Notification Waiver Determination

Princeton Digital Group Australia – land located in Campbelltown, NSW

Acquisition	Princeton Digital Group (Australia Alpha) Prop Pty Ltd (Princeton Digital Group Australia) applied for a notification waiver in respect of its proposed acquisition of land located in Campbelltown, NSW from MH Property No. 1 Pty Ltd, as described in the transaction documents provided as part of the application (the Acquisition).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition is not required to be notified.
Date of determination	21 April 2026

Parties to the Acquisition	The acquirer, Princeton Digital Group Australia, is a subsidiary of Princeton Digital Group. Prince Digital Group is headquartered in Singapore and operates a data centre business across more than 20 centres in seven countries. Princeton Digital Group does not own or operate any data centre assets in Australia. The land located in Campbelltown, NSW is currently vacant and contains no existing fixtures, structures or buildings. The land will be acquired by way of a land title transfer from MH Property No.1 Pty Ltd, which is an Australian property developer. The Acquisition is for the purpose of building, owning and operating a data centre in Australia. Princeton Digital Group intends to supply data centre facilities and associated infrastructure to tenants in Australia.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the ACCC) has considered the information provided with the notification waiver application and had regard to the factors in section 51ABV(2)(b) of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). Based on the information provided in the application, the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition. In particular: - Princeton Digital Group does not operate any data centre facilities in Australia - there are other suppliers of data centre facilities and associated infrastructure in Australia. In these circumstances, the ACCC does not consider it necessary to reach a concluded view on the likelihood of the notification thresholds being met.

	The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's interim guidance on notification waivers and merger assessment guidelines.
