

Notification Waiver Determination

Siemens Energy – Camlin Group

Acquisition	Siemens Energy Limited (together with its corporate group, Siemens Energy) applied for a notification waiver in respect of its proposed acquisition of the entire issued share capital of Camlin Limited and its global subsidiaries (Camlin Group), as described in the transaction documents provided as part of the application (the Acquisition).
Determination	The Australian Competition and Consumer Commission has determined under section 51ABV(1)(a) of the <i>Competition and Consumer Act 2010</i> (Cth) that the Acquisition is not required to be notified.
Date of determination	6 July 2026

Parties to the Acquisition	The acquirer, Siemens Energy, is headquartered in Germany and operates in four main business areas: (i) gas services; (ii) grid technologies; (iii) transformation of industry; and (iv) Siemens Gamesa Renewable Energy. Siemens Energy is active in the energy sector, offering products and services in conventional and renewable power technologies, grid technology, energy storage and solutions for electrifying industrial processes. Siemens Energy has over 100,000 employees across 90 countries. The target, Camlin Group, is a private company, headquartered in Northern Ireland, which provides monitoring solutions for the energy sector and railways. Camlin Group provides services in over 45 countries from its offices in the UK, the US, France and China, and its 21 facilities in 17 countries. Camlin Group has around 600 employees globally. In Australia, Camlin Group is active through Camlin (Australia) Pty Ltd, the primary vehicle with which to contract with Australian customers. Globally, Camlin Group operates in two business areas: • Energy – Camlin Group provides solutions for real-time monitoring and predictive fault management across the power chain (i.e., generation, transmission, distribution and private networks). In particular, Camlin Group provides its sensing technology and intelligent analytics solutions for: (i) low voltage networks, (ii) overhead lines, (iii) transformer monitoring, (iv) switchgear/circuit breaker monitoring, (v) generator monitoring, and (vi) inbuilding power networks. These solutions account for the vast majority their business. • Rail – Camlin Group provides visual in-service, non-intrusive inspection solutions of pantographs, catenary, roofs, bogies and signalling power for fleet and infrastructure operators to
-----------------------------------	---

	detect issues early. However, these solutions only account for a small proportion of Camlin Group's business. Globally, the parties both supply of monitoring solutions for (i) transformers, (ii) switchgears/circuit breakers and (iii) overhead lines. However, the application states that Siemens Energy does not supply any of these monitoring solutions in Australia. Further, Camlin Group does not supply any monitoring solutions for overhead lines in Australia. Globally, Siemens Energy also supplies transformers and switchgears/circuit breakers.
Explanation for determination	In making this notification waiver determination, the Australian Competition and Consumer Commission (the ACCC) has considered the information provided with the notification waiver application and had regard to the factors in section 51ABV(2)(b) of the <i>Competition and Consumer Act 2010</i> (Cth) (the Act). Based on the information provided in the application, the ACCC considers that the Acquisition is unlikely to give rise to any material lessening of competition. In particular: a. there is no horizontal overlap between Siemens Energy and Camlin Group in the supply of monitoring solutions for transformers and switchgears/circuit breakers in Australia b. there are alternative suppliers of monitoring solutions for transformers and switchgears/circuit breakers for customers in Australia c. there is a low risk of foreclosure or other concerning vertical effects in Australia resulting from exclusionary conduct post-acquisition. The ACCC has also had regard to the likelihood that, if the Acquisition were put into effect, the notification thresholds determined under section 51ABP(1) of the Act would apply. While the ACCC considers that the notification thresholds are likely to be met, given that material competition concerns are unlikely to arise, the ACCC has determined that the Acquisition is not required to be notified. The ACCC considers that the determination is consistent with the object of the Act and the interests of consumers in promoting competition. For more information about the ACCC's approach to considering notification waiver applications and to assessing competition effects more generally, see the ACCC's interim guidance on notification waivers and merger assessment guidelines.

Determination made by Commissioner Williams pursuant to a delegation under section 25(1) of the Act
